/04

VERSATILE

The "Hunter" firepit continues to be a fan favourite for those keen on open fire cooking as well as a functional firepit. Adjustable heights and plenty of space for wood & coal.

FULL RANGE OF FIREWOOD

BIRCH

Birch firewood ignites easily and burns brightly with a pleasing aroma. It provides moderate heat and creates minimal smoke, making it ideal for both indoor and outdoor use.

BEECH

Beech firewood is dense and burns slowly, producing a steady, high heat output. Its clean burn leaves behind minimal ash, making it a popular choice for long-lasting fires.

OAK

Oak firewood is renowned for its exceptional heat and long burn time. It requires a longer seasoning period but rewards with a robust, steady fire perfect for heating and cooking.

OLIVE

Olive firewood is known for its high density and long burn duration. It emits a rich, mild aroma and produces a consistent, intense heat, ideal for wood-fired ovens and stoves.
