# BUILDING BLOCKS FOR YOUR PROFITABLE GROWTH

Welcome to STV's 2024 catalogue, heralding the new Autumn and Winter-season ahead, and packed full of innovative ways to grow your retail pest control business.

It's been an exceptionally tough trading year, but DIY pest control has continued to grow - often in place of more expensive professional pest control services - with many categories leaping ahead year on year.

You will find out more about the UK pest control market as you read on, but for now please let me extend our thanks to you for the most important element in the retail mix - your personal commitment, hard work, and support. Thank you!

As ever, the best of our business has followed active dialogue with you, our valued retail customers: the STV team has met with hundreds of garden and hardware retailers in the past year, and it has been a pleasure to welcome store managers and buyers from across the country to our on-site showroom here at STV, as well as visit many of you with our mobile showroom.

For the next six months you can look forward to continued peak-season demand for rodent control solutions, as well as valuable extra sales driven by target pests such as moles, foxes, and wildlife, all under The Big Cheese brand. Sales of Zero In insect control will also continue apace, driven by a growing number of close-to-home pests including bed bugs, clothes moths, fleas, and carpet beetles.

As well as helping you to make more from these in-season opportunities, the STV team will show you some great new ways to drive profitable sales growth in 2024. Our pre-season offer, for delivery from now until February-End, features 15 new Development Deals that will earn you a 60% gross margin, 10 new In-Store Problem Solved Video Displays

featuring seasonal best-sellers, and the opportunity to lock into a Key Stockist Discount that guarantees you season-long profitability.

As part of our continued investment in Key Stockists, new Top 200 merchandising, with interactive Select-A-Pest product guidance and in-built Seasonal Best-Seller video displays, is also now available for both The Big Cheese and Zero In ranges. The displays are particularly recommended for larger retail outlets and garden centres: The Big Cheese Top 100 displays were installed in over 100 retail outlets this year, achieving average sales growth of 25%.

All in all, we're very confident that the combination of strong marketing around great products and leading brands on offer from STV this season is the right recipe to drive profitable sales growth for your business. And we are looking forward to meeting with you in the weeks to come and to working with you in 2024.

For now, our thanks again for your support and our best wishes for the Autumn Winter season ahead.

# SOME FACTS AND FIGURES

Total sales of pest control, including professional operators, have more than doubled in the past 4 years and the sales of DIY products have also grown rapidly to **£157m** at retail. But, so too has the cost of engaging a professional pest control operator, which now stands at an average of **£230** per day

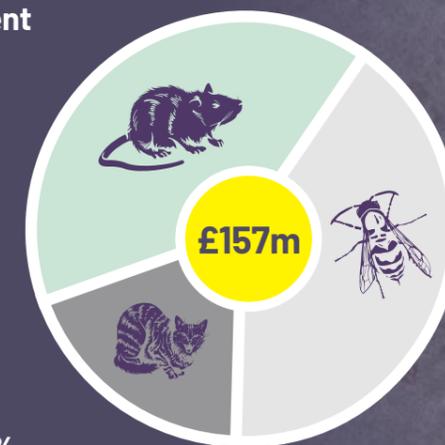

Rising service costs are driving consumers to seek more affordable DIY pest control solutions. This change in consumer behaviour is helping to drive rapid market growth

The total DIY pest control sector is divided into three sectors

40% Rodent

19% Non-Rodent

41% Insect

The Big Cheese is Britain's most trusted DIY rodent control brand and now accounts for more than a third of all sales

Approaching half of all sales are Poison-Free products

20% of rodent control products are sold through garden centres and another 10% through high street hardware

£62 million

RODENT

The Big Cheese now includes the UK's most comprehensive vertebrate control range

The range is entirely poison-free and welfare-friendly, with more than 40% of all retail sales being to deter cats and dogs

More than a quarter of all products in the sector are purchased on the high street

£30 million

NON-RODENT

Zero In is the UK's fastest growing insect control brand and now accounts for more than a quarter of all retail sales

Ants, flies, and wasps make up the lion's share of pest problems

Grocery multiples sell more than a 25% of all insect control products, with the focus mainly on fly and ant killing aerosols

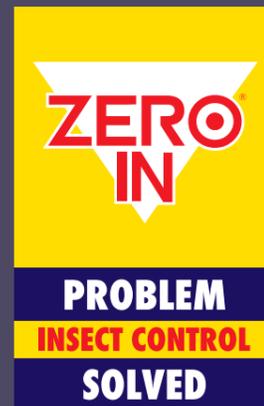

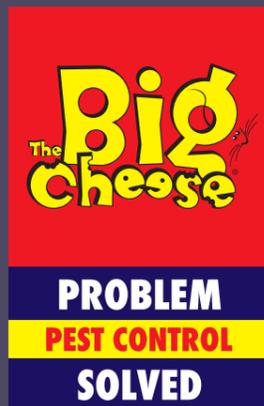

£65 million

INSECT

Total £157m

## We'll help you get your share

Two market-leading brands will form the building blocks of future sales growth for STV and its retail customers. Last year we saw sales of more than **10 million pieces of pest control product at an average retail price of £8**. We are building on this success for season 2024 with a range of marketing and promotions to make sure you achieve your share of the vibrant and growing DIY pest control market.

# PEOPLE PESTS PLANET

We focus on the protection of people, wherever pests threaten health and wellbeing, and with the minimum impact on the planet. We hold these values at the centre of our business and they form the foundations of our marketing and development plans for 2024 and beyond

### Our People

Over 50% of our management team comes from internal role development and promotion and our commitment to staff training is ongoing

### Sustainable Development

We focus on new product development that reduces the use of traditional chemical controls, with the aim of working towards a Poison-Free future

PEOPLE

PESTS

STV  
LIVE PEST-FREE

### Home Supply

Our target is to have 50% of product sourced from the UK and Europe by August-End 2024, with much of it made here at STV

### Sustainability & Auditing

Our packaging is now more than 85% paper based including more than half of this from FSC accredited sources. We are also SEDEX audited annually

PLANET

### Stock Efficiency

Our stock holding target for August-End 2024 is £4.5 million, 45% lower than it was two years ago. Lower stock levels will free up working capital for future development

### Service Levels

In spite of reduced stock levels, a new distribution centre, and improved operating systems mean that we can realistically expect to match or better 2023's OTIF delivery levels of 98.1% over the next 12 months
